

1 AN ACT relating to nuclear power.

2 ***Be it enacted by the General Assembly of the Commonwealth of Kentucky:***

3 ➔Section 1. KRS 278.600 is amended to read as follows:

4 As used in **this section and** KRS ~~[278.605 and]~~ 278.610, unless the context requires  
5 otherwise:

6 (1) "Nuclear power facility" or "nuclear facility" means a nuclear fission thermal power  
7 plant;

8 (2) "High~~[-]~~level nuclear wastes" means the aqueous wastes resulting from the  
9 operation of the first cycle of the solvent extraction system or equivalent and the  
10 concentrated wastes of the subsequent extraction cycles or equivalent in a facility  
11 for reprocessing irradiated reactor fuel. High~~[-]~~level nuclear wastes shall include  
12 spent fuel assemblies prior to fuel reprocessing;

13 (3) "Certify" means to issue a certificate of public convenience and necessity under  
14 KRS 278.020;

15 (4) "**Plan**~~[Technology or means]~~ for **storage**~~[the disposal]~~ of high-level nuclear waste"  
16 means a method for the **storage**~~[permanent and terminal disposal]~~ of high-level  
17 nuclear waste **in accordance with federal laws and regulations**~~[. Such disposition~~  
18 ~~shall not necessarily preclude the possibility of an approved process for retrieval of~~  
19 ~~such waste]~~;

20 **(5) "Storage" means the retention of high-level nuclear waste, spent nuclear fuel, or**  
21 **transuranic waste with the intent to recover the waste or fuel for subsequent use,**  
22 **processing, or disposal; and**

23 **(6) "Low-level nuclear waste" means items that have become contaminated with**  
24 **radioactive material or have become radioactive through exposure to neutron**  
25 **radiation.**

26 **(7) "Mixed nuclear waste means waste that is both radioactive and chemically**  
27 **hazardous.**

1        ➔ Section 2. KRS 278.610 is amended to read as follows:

2        ~~(1) [If the requirements of KRS 278.605 have been met,]~~ The Public Service  
3        Commission may certify a nuclear power facility if it finds that **the facility and plan**  
4        **for storage of the facility's high-level nuclear waste have been approved by the**  
5        **Nuclear Regulatory Commission.**~~;~~

6        ~~(1) Specific facilities with adequate capacity to contain high-level nuclear waste are in~~  
7        ~~actual operation, or will be in operation at the time the nuclear power facility being~~  
8        ~~certified requires the means for the disposal of high-level nuclear waste;~~

9        ~~(2) The plan for disposal of high-level nuclear waste for the nuclear facility to be~~  
10       ~~certified is in full conformity with the technology approved by the authorized~~  
11       ~~agency of the United States government; and~~

12       ~~(3) The cost of disposal of high-level nuclear waste from the nuclear facility to be~~  
13       ~~certified is known with reasonable certainty, such that an accurate economic~~  
14       ~~assessment of the proposal can be completed]~~

15       **(2) The commission may hire a consultant to perform duties relating to this section.**  
16       **Any expenses or fees incurred by the commission in hiring a consultant shall be**  
17       **borne by the applicant.**

18       **(3) The construction of low-level nuclear waste disposal sites in the Commonwealth**  
19       **shall be prohibited, except as provided in KRS 211.852.**

20       ➔ Section 3. The following KRS section is repealed:

21       278.605 Construction prohibited until means for disposal of high-level nuclear waste  
22       approved by United States government -- Exceptions for nuclear-based  
23       technologies.

24       ➔ Section 4. The Energy and Environment Cabinet is directed to review existing  
25       state administrative regulations to establish what changes will be required for permitting  
26       of nuclear power generating facilities. The cabinet shall report its recommendations to the  
27       Legislative Research Commission by December 1, 2017.
